

Fireworks in a Jar

Ingredients:

- Tall glass jar
- Liquid food coloring (whichever colors you want)
- 3-4 tablespoons of oil
- Small glass bowl or cup

Directions:

1. Fill glass jar $\frac{3}{4}$ full of water
2. measure 3-4 tablespoons of oil into small glass bowl or cup
3. add 4-5 drops of each color of food coloring into oil
4. carefully stir oil and food coloring 2-3 times to break the food coloring into smaller drops
5. Pour oil mixture into jar of water
6. Watch "fireworks" appear as the oil and water separate

*If it isn't easy to see try holding a white piece of paper behind the jar. Send me videos or pictures if you try this I would love to see YOUR fireworks!
